G. Graduate Student Representation on ENDY Steering Committee
I. ACADEMIC HONESTY AND HONOR CODE

The Environmental Dynamics Program is committed to the principles of academic honesty and has a zero-tolerance policy regarding infractions related to University of Arkansas policies on academic honesty. It is the responsibility of ALL students in the ENDY program to know and understand the Academic Honesty Policy of the University of Arkansas. The entire academic honesty policy and procedures related to the academic honesty policy are available for review at the following URL:  http://honesty.uark.edu

The ENDY Program Director expects every student matriculating in the ENDY program to be familiar with this policy and to comply absolutely with its application and enforcement during the term of your study and research in the ENDY Program. Additionally, students should endeavor to remain aware of periodic updates to the academic honesty policy of the University of Arkansas.

Any breach of standards of academic honesty by ENDY students will be referred to the Academic Integrity Monitor for the Graduate School and adjudicated as specified by the Academic Honesty Policy of the University of Arkansas. Determinations resulting from this process will be duly followed by the ENDY Program Director, ENDY Program Coordinator, ENDY Faculty, and ENDY students.

A. Honor Code for the Graduate School

The mission of the Graduate School is to provide post-baccalaureate students with the opportunity to further their educational goals through programs of study, teaching, and research in an environment that promotes freedom of expression, intellectual inquiry, and professional integrity. This mission is only possible when intellectual honesty and individual integrity are taken for granted. The graduate student at the University of Arkansas is expected to:

a) know and abide by the regulations for all students, as described in the Student Handbook published by the Vice Chancellor for Student Affairs, and

b) know and abide by the regulations contained within the Academic Honesty Policy for Graduate Students and the Research Misconduct Policy.

It is expected that graduate students will refrain from all acts of academic and research dishonesty and will furthermore report to the Graduate School any acts witnessed. The pledge of the Honor Code is this:

“On my honor as a graduate student at the University of Arkansas, I certify that I will neither give nor receive inappropriate assistance on the work I do for my degree.”

Students will be asked to sign this pledge when they are admitted to the Graduate School. Faculty, Department Chairs and/or Program Directors also may require students to sign this pledge before completing the requirements of a course or a program of study. The Environmental Dynamics Program requires students sign this pledge. The Environmental Dynamics Program further requires that the signed pledge be placed in the student’s file. Lack
of a signed pledge on file in the Program office may result in delay of graduation from the doctoral program.

II. INTRODUCTION

As part of the University of Arkansas Graduate School, the Environmental Dynamics Program (ENDY) offers a Doctor of Philosophy (Ph.D) degree in Environmental Dynamics. This handbook describes admissions and degree requirements, and includes an example schedule as a guide to earning the degree. You are expected to be familiar with the handbook contents as they apply to your program of studies.

This handbook supplements the University of Arkansas Graduate School Catalog that lists all courses approved for graduate credit, as well as requirements for all campus graduate programs and the University of Arkansas Graduate School Handbook containing similar information. Each of these documents is available online and can be accessed via the Internet at:

University of Arkansas Graduate Catalog
http://catalog.uark.edu/graduatecatalog/
University of Arkansas Graduate Handbook
http://grad.uark.edu/dean/GRADUATE_STUDENT_HANDBOOK.pdf

Additional information regarding student life, responsibilities, and University of Arkansas Policies governing student conduct can also be obtained by reading the Code of Student Life – Student Conduct and Disciplinary Proceedings online at:

University of Arkansas Code of Student Conduct
http://ethics.uark.edu/

Finally, information related to the University of Arkansas Graduate School and its policies and procedures can be obtained from the Graduate School website at:

University of Arkansas Graduate School

A. Description of the Environmental Dynamics Program

The Environmental Dynamics program focuses on the study of complex human and environmental interactions. It stresses interdisciplinary regional analysis of geophysical, biological, climatic, and socio-cultural interactions and changes, including natural and social impacts of such dimensions as global climate change, human demography, pollution, landscape evolution and degradation, earthquakes, groundwater depletion, and global sustainability. The program stresses the application of appropriate methodologies such as GIS, GPS, remote sensing, computer modeling, and cartography to environmental problems. The research approach integrates the power, efficiency, and economy of advanced computer-based technologies into the study of human-environmental interactions within recent Earth history.

1. Purpose and Goals of the Environmental Dynamics Program

The ENDY Program emphasizes original doctoral research at the interface between physical, biological, and socio-cultural disciplines. This often requires creative formulation of problem solving between established academic disciplines. Attention is given to both theoretical and applied issues. Each student is expected to develop an original, innovative research program in consultation with appropriate faculty members who serve as mentors and supervisors of the research, to successfully complete core course requirements and elective courses, and to complete a distinctive dissertation that significantly advances human knowledge. The ENDY program allows students to focus on a program leading to diverse careers in academia, international organizations, federal and state agencies, or private sector and consulting careers.

2. Dissertation Titles Completed in the Environmental Dynamics Program

The table below provides the titles of doctoral dissertations completed in the Environmental Dynamics Program since its inception in 1998. A review of these titles reveals the breadth and depth of investigations in Environmental Dynamics at the University of Arkansas. Further, this list illustrates the diversity of interdisciplinary topics within the domain of Environmental Dynamics.
## Table 1. Dissertations Completed in the Environmental Dynamics Program, 2001-2010

B. Appropriate Students for the Environmental Dynamics Program

The Environmental Dynamics Program seeks qualified, highly-motivated students interested in interdisciplinary research that embraces the complex interactions of human populations with their natural world through time. As such, the academic discipline and background of prospective students is open. Graduates and current candidates within the ENDY Program have experience and degrees in Anthropology, Atmospheric Sciences, Biology, Computer Sciences, Engineering, Forestry, Geosciences, Geography, History, Hydrology, Landscape Architecture, Soil Science, Water Resources, and others.

C. Administrative Structure and Contacts

The ENDY faculty consists of regular faculty from the Department of Anthropology and Department of Geosciences, and cooperating faculty from these and other departments and colleges across the University of Arkansas. In addition, faculty from the Departments of Agricultural Economics and Agribusiness, Biological Sciences, Biological and Agricultural Engineering, Chemistry and Biochemistry, Crop, Soil, and Environmental Sciences, History, and Landscape Architecture make up the current ENDY faculty. The ENDY program began in 1998 with 40 regular faculty and 20 cooperating faculty. An up-to-date listing of current faculty is provided on the ENDY web page: http://environmental-dynamics.uark.edu/people/faculty.php

The program has an organizational structure of a Director, two Associate Directors, and a Steering Committee of additional faculty members and unit directors (see table below). A number of faculty from the Arkansas Archeological Survey, both on campus and at different research stations throughout the state, participate in mentoring and supervising ENDY students as well.

The Environmental Dynamics Program maintains strong associations with several University of Arkansas research units including the Center for Advanced Spatial Technologies (CAST), the Arkansas Water Resource Center (AWRC), the Center for Agricultural and Rural Sustainability (CARS), the Office for Sustainability, the Sustainability Consortium, the University of Arkansas Tree Ring Laboratory, the U. S. Geological Survey and the U.S. Department of Agriculture, National Water Management Center. In addition, ENDY faculty and students collaborate with other interdisciplinary degree programs at the University of Arkansas such as the Public Policy Program and the Arkansas Center for Space and Planetary Sciences.

The table below provides the names, and contact addresses of the director, associate directors, and Environmental Dynamics Steering Committee members.

Fayetteville, AR 72701  
aowest@uark.edu

**D. Example Program Schedule**

The table below provides a schematic illustration of a typical program of study for students admitted to the ENDY program. The ENDY program currently employs a cohort admissions strategy, admitting new students as a group (cohort) for the fall semester of each academic year. Cohort admissions are viewed as a best practice by the Council of Graduate Schools, enabling students to assimilate more quickly into the program and permitting students to develop stronger bonds with their peers as they progress through the program together. We also strongly recommend applying for the Graduate Certificate in Sustainability. All your required courses in ENDY apply toward this certificate. Information regarding the Graduate Certificate in Sustainability is available from the ENDY Program Director.
The information presented below is intended to serve as a general guide to the sequencing of events during the student’s tenure in the ENDY program. However, individual circumstances may result in slight modifications to this proposed scheme. The ENDY program and its faculty are committed to helping students progress through the program efficiently, but recognize the value of maintaining some flexibility to accommodate individual needs in consultation with the student’s advisory committees.

### SEMESTER | ENDY PROGRAM TARGET MILESTONES
--- | ---
1 | Enter program, establish Advisory Committee, complete first two courses and 1st semester of ENDY Seminar, initiate discussions with potential dissertation advisors to identify appropriate dissertation research topic.
2 | Complete second two core courses the 2nd semester of ENDY Seminar, finalize discussions with potential dissertation advisor regarding dissertation research project, initiate development of dissertation proposal including library research and writing of grant proposals to support dissertation research in consultation with dissertation advisor and Advisory Committee, complete Annual Review of Graduate Student Progress.
--- | ---
Summer | Conduct preliminary research with objective of finalizing dissertation proposal, initiate discussions with ENDY faculty to assemble Comprehensive Examination Committee and Dissertation Committee, make preparations for Written Comprehensive Examinations, to include final identification and assembly of Comprehensive Examination Committee.
3 | Continue with completion of elective coursework and 3rd semester of ENDY Seminar, finalize dissertation proposal, complete Written Comprehensive Examination (typically late October to mid-November), select final Dissertation Committee members, schedule and present Oral Defense of Dissertation Proposal.
--- | ---
4 | Continue with completion of elective coursework, conduct research related to dissertation project, complete Annual Review of Graduate Student Progress.
Summer | Conduct research related to dissertation project and initiate writing of dissertation.
5 | Conduct research related to dissertation project and writing of dissertation.
6 | Complete dissertation, schedule and present public defense of dissertation, complete Annual Review of Graduate Student Progress, graduate.
III. ADMISSION REQUIREMENTS AND PROCEDURES

A. The University of Arkansas Graduate School

Admission to the Graduate School is a co-requisite for admission to the ENDY program. Admission procedures and requirements are outlined in detail in the Graduate School Catalog. Application forms and catalogs can be obtained from the ENDY office or from the Graduate School:

Graduate School Admissions Office
213 G. David Gearhart Hall
University of Arkansas
Fayetteville, AR 72701
(479) 575-4401
toll-free 1-866-234-3957

1. Admissions Requirements

The general requirements for regular admission to graduate standing within the University of Arkansas Graduate School and acceptance in the ENDY program of study leading to a doctoral degree are:

- A Master’s Degree

- a cumulative grade-point average of 3.00 or better (A=4.00) on all course work taken prior to receipt of a baccalaureate degree from a regionally accredited institution of higher education, or

- a grade-point average of 3.20 or better on the last 60 hours of course work taken prior to receipt of the baccalaureate degree from a regionally accredited institution of higher education, or

- a grade-point average between 2.50 and 3.2 on all course work taken prior to receipt of a baccalaureate degree from a regionally accredited institution of higher education and a satisfactory score on the Graduate Record Examinations general test, the Miller Analogies Test, or a similar test acceptable to the Graduate Dean, or

- conferral of a post-baccalaureate graduate degree (excluding professional degrees) from a regionally accredited institution.

Additional details regarding admissions and categories of graduate admission are available in the Graduate School Catalog. Prospective applications are encouraged to refer to the Graduate School Catalog for any additional information they may require.
2. Application Procedure

To apply for admission to the Environmental Dynamics Program, obtain the forms indicated below and return directly to the Environmental Dynamics Program office, 216 OZAR, University of Arkansas, Fayetteville, AR 72701.

- Apply online at: https://application.uark.edu/

- Answer the questions on the online application. A copy of the application form should be sent directly to the Environmental Dynamics Program office. The processing fee is collected online at the time the online application is completed. If for any reason the online application is not accessible, the form and check is to be sent to the Graduate School and a copy sent to the ENDY Program. An applicant must also arrange for two copies of official transcripts to be sent from every college or university you have attended. Transcripts should be sent directly to the Environmental Dynamics Program office.

- Finally, applicants are required to forward results of the Graduate Record Examination (GRE) or equivalent standardized examination to the Graduate School for inclusion in their application file. A copy of GRE scores should be forwarded to the Environmental Dynamics Program office as well.

The International Admissions, located within the Graduate School in G. David Gearhart Hall, provides evaluation services as part of the Graduate School for all international graduate applicants. International Applicants should refer to the web site of the International Admissions http://catalog.uark.edu/graduatecatalog/admissions/ for specific information related to the application procedure for international students.

The International Admissions may require all international applicants to successfully complete the TOEFL exam (550 or above on the written exam). International students who teach courses at the University of Arkansas must take a proficiency exam before they begin their teaching duties. See the Graduate Handbook for details: at http://catalog.uark.edu/graduatecatalog/admissions/

3. Application Forms

All necessary application forms may be obtained from the Graduate School, 213 Ozark Hall, University of Arkansas, Fayetteville, 72701 or completed online at the Graduate School web-site https://application.uark.edu/

The application deadline for Fall admission each year is January 15th. So a student wishing to start graduate school in Fall of 2016 would need to arrange for ALL application materials to be on file by January 15th, 2016.

B. Environmental Dynamics Program

Admission to the University of Arkansas Graduate School does not automatically confer admission into the Environmental Dynamics Program. Admission to the
Environmental Dynamics Program is decided by the ENDY Steering Committee following review and evaluation of application materials submitted by prospective students.

Normally, applicants will be accepted or declined based on review of submitted application materials. However, in considering applications, the ENDY Steering Committee may evaluate not only the applicant’s academic record, but also the applicant’s stated intentions and their relevance to the ENDY program, the availability or potential for extramural funding support for the applicant’s research, and the availability of faculty with requisite expertise to supervise the dissertation research.

All applicants will be informed in writing about admissions decisions.

Once admitted to the ENDY program, the student must comply with policies and procedures of both the Graduate School and the ENDY program. The student is responsible for adhering to regulations outlined in the Graduate School Catalog, the Code of Student Life, and ENDY policies and procedures as set forth in this handbook.

1. Admissions Requirements

To be considered for admission to the ENDY program, students must meet the following criteria:

- The applicant must have an MA or MS or equivalent graduate degree;
  - while the applicant may apply to the ENDY program while still working on a master’s degree, all requirements for that degree must be completed by the beginning of the first semester of ENDY course work;
  - in cases where BA/BS (or equivalent) students with especially strong and ENDY-related academic backgrounds apply to the program, we may admit these students to the program conditional upon first completing an MA/MS degree;

- The applicant must have a 3.2 or better GPA for MA/MS work (or for BA/BS work if applying prior to completing the MA/MS degree);

If the applicant is currently (or recently has been) a graduate student at the University of Arkansas, it is necessary to reapply to the Graduate School and also necessary to submit all the application materials listed below to the ENDY program for admission to the program.

2. Application Deadlines

Normally, the regular admission cycle begins in December for fall admission, with a funding application deadline of 15 January (check our homepage for the deadline: [http://endy.uark.edu](http://endy.uark.edu)).

To be considered for admission to the fall semester of the academic year (typically beginning in late-August), applicants should arrange for all necessary application materials to be submitted to the ENDY program no later than the 15 January deadline.
For students applying for financial support through a competitively-awarded graduate assistantship, applicants should arrange for all necessary application materials for the Graduate School and the ENDY program to be submitted on or before the 15 January deadline of the year in which admission is desired.

3. Application Procedure

To complete an application for admission to the ENDY program, applicants must complete and submit an application for admission to the University of Arkansas Graduate School. The remainder of the materials should be submitted directly to the ENDY program. In addition to the application form in order to further evaluate the qualifications of prospective ENDY students, the ENDY program requires the following application materials to be submitted directly to the ENDY office:

- Three letters of recommendation from individuals familiar with the applicant’s academic or work history who can give candid assessments of the applicant’s ability to perform at the Ph.D. level;

- A three-page statement of intent including the applicant’s reasons for pursuing a doctoral degree in ENDY, relevance of prior academic or work experience, current research interests or employment that bears on the degree, special skills, fieldwork experience, familiarity with interdisciplinary work, if any, and future career goals;

- A writing sample, such as a publication, report, major term paper, undergraduate honors thesis, chapter of an MA or MS thesis, or similar document that demonstrates the applicant’s organizational skills, ability to conduct meaningful research, familiarity with the body of research literature, ability to report clearly on academic topics, and general writing skills (note: please send a copy, not an original, of a thesis or term paper; this sample will not be returned);

- Any other relevant information that would assist the Steering Committee in selecting applicants;

- For students requesting consideration for a graduate assistantship, a completed University of Arkansas Graduate School Assistantship form should also be submitted.

C. Financial Assistance

Financial assistance is available for qualified applicants in the form of limited numbers of graduate assistantships, research assistantships, doctoral fellowships, and other scholarships made available through the University of Arkansas, private foundations, and public resources.

1. Graduate Assistantships

The ENDY program has a limited number of graduate assistantships available to assist highly qualified individuals defray some of the costs of their graduate education. Graduate assistantships are awarded annually on a competitive basis following review of application materials.
As a general rule, graduate assistantships are awarded for the academic year in which admission to the ENDY program is desired. Each award carries a stipend for the twelve-month academic year during which the awardee is expected to assist with various duties within the ENDY program and the home department sponsoring the student. These duties usually involve assistance with classroom teaching and laboratory teaching, but may also involve assistance with departmental research, grant writing, or other departmental service activities where there is a need.

In addition to the stipend associated with the graduate assistantship, for purposes of tuition, awardees are considered residents of Arkansas and therefore eligible for in-state resident tuition rates. However, the assistantship carries a tuition waiver for the duration of the award up to 21 hours per year of graduate credit. Students with graduate assistantships are required to pay various university fees (e.g., activity fee, parking fee, technology fee, etc.).

Additional information regarding graduate assistantships is available in the Graduate School Handbook or online at:

http://grad.uark.edu/future/funding/gradassistants.php

2. Research Assistantships

Research Assistantships are stipends paid from a grant/contract held by a faculty member or organizational unit on campus. Normally, the Graduate School does not award research assistantships; rather, these are paid by an individual department, faculty member, or organizational unit on campus. However, the Dean of the Graduate School must approve all requests for new graduate assistant positions.

Students desiring a research assistantship should contact individual faculty within the ENDY program or other organizational units on campus to determine the potential availability of these awards.

3. Distinguished Doctoral Fellowships

As a result of a $300 million gift to the University of Arkansas in 2003, the Graduate School has a number of Distinguished Doctoral Fellowships (DDF) that may be awarded to the ENDY program on a competitive basis. These fellowships are the most prestigious fellowships offered at the University of Arkansas and are reserved for applicants of exceptional ability and promise for advanced research. Distinguished Doctoral Fellowships carry a stipend of $22,000+$13,187 base stipend provided by ENDY annually plus paid tuition. These fellowships are awarded for up to four years to qualified candidates. To qualify for the Distinguished Doctoral Fellowship, students must have minimum scores on the Graduate Record Examination of 308 (combined verbal + quantitative), 4.5 (GRE Analytical Writing), and a cumulative graduate GPA of 3.8.

4. Doctoral Academy Fellowships

As a result of a $300 million gift to the University of Arkansas in 2003, the Graduate School has a number of Doctoral Academy Fellowships (DAF) that may be awarded to the
ENDY program on a competitive basis. These fellowships are reserved for applicants of exceptional ability and promise for advanced research. Doctoral Academy Fellowships add $10,000+$13,187 base stipend provided by ENDY annually to the base stipend for ENDY graduate assistantships ($13,000) and include paid tuition. These fellowships are awarded for up to four years to qualified candidates. To qualify for the Doctoral Academy Fellowship, students must have minimum scores on the Graduate Record Examination of 301 (combined verbal + quantitative), 4.0 (GRE Analytical Writing), and a cumulative graduate GPA of 3.65.

5. Doctoral Fellowships

The Graduate School also awards a limited number of other Doctoral Fellowships each year. They are stipends paid to students of outstanding ability for recruitment to doctoral programs of proven strength and vigor. These fellowships may supplement other stipends and grants that the students receive. Contact the Graduate School for the specific amounts of these fellowships.

The fellowships will be granted for up to four years with annual renewal contingent upon superior academic performance and progress toward the degree.

Additional details regarding doctoral fellowships can be obtained from the Graduate School Handbook or online at

http://grad.uark.edu/future/funding/fellowships.php

6. Other Forms of Financial Assistance

Other forms of financial assistance may be available to students in the form of scholarships, foundation awards, student loans, or other grants of various kinds. Students interested in obtaining financial assistance or identifying appropriate opportunities for financial assistance are directed to contact the University of Arkansas, Office of Financial Aid:

Office of Financial Aid
114 Silas Hunt Hall
Fayetteville, AR 72701
(479) 575-3806

or online at: http://finaid.uark.edu/

IV. CORE CURRICULUM AND ELECTIVE COURSES

A. Declaration of Intent.

Students who wish to become candidates for the degree of Doctor of Philosophy must sign a statement of their intention to become doctoral candidates with the Dean of the Graduate School. This is part of the acceptance letter. A student cannot satisfy any part of the residence requirement for the doctoral degree until after a Declaration of Intent has been filed with the Dean of the Graduate School.
Immediately after the student has filed a Declaration of Intent and indicated the major field of study, a Doctoral Program Advisory Committee will be appointed (with the approval of the Dean of the Graduate School) from the graduate faculty to evaluate the student's preparation and fitness for further graduate work.

**B. Faculty Advisor and Advisory Committee**

Upon entry into the ENDY program, all students will be assigned an advisor. Students must have an advisor to proceed in the program. The student may elect to change advisors (especially from the initial assigned advisor to a permanent one, once the student is part of the program).

Once a faculty advisor is selected, the student must assemble an Advisory Committee consisting of the faculty advisor and two additional faculty members selected by the student in consultation with his/her advisor. This committee must include persons representing two or more disciplines. Once the Advisory Committee is selected, the Advisory Committee form should be completed, signed, and submitted to the ENDY office and Graduate School for inclusion in the student’s permanent file. It is important that students and faculty advisors recognize the importance of establishing the Advisory Committee as soon as possible following the student’s entry into the ENDY program, and should endeavor to do so no later than the 4th week of the student’s first semester.

The function of the Advisory Committee is to provide guidance to the student in selecting courses appropriate to completing the degree program. The committee will assist the student in selecting courses that balance the physical, social, and biological sciences based on discussion with the student regarding areas of interest and potential dissertation projects.

**C. Residency Requirement**

Residence requirements are intended to insure that every doctoral student has ample opportunity for significant intellectual development, which can result from a sustained period of intensive study and close association with other scholars in the intellectual environment of the University. The requirement recognizes that growth as an independent scholar is not merely a matter of class attendance, but rather involves a broader development of the intellect which comes about through intensive study, independent research, sustained association with faculty members and other colleagues who share common scholarly and professional interests, attendance at seminars and colloquia, intensive reading and familiarization with library resources, consultation with specialists in other disciplines and resource centers, and the opportunity for broadened exposure to current intellectual issues as they are revealed in various campus offerings.

After filing a Declaration of Intent to pursue the doctoral degree, a student must fulfill a residence requirement by completing a minimum of two consecutive semesters of full-time graduate study (nine hours or more per semester), either fall-spring, spring-fall, spring and a complete 12-week summer session, or a complete 12-week summer session and fall. This period of residence is independent of and in addition to that required for any other graduate degree. During this period of residence, the student must be continually involved on a full-time basis
with the on-site academic, scholarly, and research activities of the academic department (or corresponding academic unit) in which the degree program is administered.

A student who does not concurrently hold appointment as a Graduate Assistant must satisfactorily complete a minimum of nine semester hours, including dissertation credits but exclusive of courses offered through the Division of Continuing Education, during each semester or summer counted in the residence period. For degree purposes, any graduate credit course offered by the University of Arkansas, Fayetteville, via distance education (regardless of class sites) will be counted as residence credit.

For students who hold appointments as Graduate Assistants this requirement is six semester hours per semester if the appointment is for 50 percent time and nine semester hours per semester if the appointment is for 25 percent time. A student not on an assistantship who intends to satisfy one semester of the residence period during the summer must satisfactorily complete a minimum of nine semester hours of such work during the summer. For a student holding a concurrent assistantship of 25 percent or 50 percent time in the summer, this requirement is three semester hours per any five- or six-week summer session.

Students who also hold University appointments, other than those of Graduate Assistant, for half time or more will be considered to contribute to the residence requirements only for semesters or 12 weeks in the summer during which all of the following criteria are met:

- the duties of the appointment primarily involve degree-related academic or scholarly activities such as dissertation research;
- the departmental chairperson (or corresponding administrator) and the student's Doctoral Program Advisory Committee certify that the duties of the appointment do not interfere with the appointee's regular participation as a student, on an essentially full-time daily basis, in the normal on site academic, scholarly, and research activities of the department and degree program and the associated scholarly demands thereof;
- the student is enrolled, for each semester or summer session counted in the residence period in at least six semester hours in each semester or three hours in each of two consecutive five-or six-week summer sessions or 6 hours in an entire ten- or twelve-week summer session; and
- file a plan for approval by the Graduate Dean in advance of satisfying residence requirements.

D. Coursework Beyond the Master’s Degree

Coursework totaling 24 hours beyond the master’s degree is required of all students in the ENDY program.

In addition, students are required to register for 1 hour of ENDY 6991 (ENDY Seminar) each semester for the first 3 semesters of their tenure in the ENDY program.
Whereas 24 hours is the required minimum course work toward the ENDY degree, additional courses may be required to provide necessary background or skills to complete the degree program. The student, the dissertation advisor, the Advisory Committee, the Comprehensive Examination Committee, the Dissertation Committee, or some combination of these entities will ordinarily identify such additional course work.

E. Doctoral Dissertation Credits

In addition to required course work, the Graduate School requires 18 hours of dissertation credit to complete a doctoral degree. These hours are taken at the end of the student’s course of study, upon the completion of regular course work and following successful assessment of competence as demonstrated by passing written and oral qualifying examinations, and while the student is conducting dissertation research.

Furthermore, the Graduate School requires all students who are candidates for a doctoral degree (students who have successfully completed their comprehensive examinations) to be continually enrolled, which means that during both semesters of the academic year and at least one session of summer school, the student must be signed up for one hour or more of dissertation credit. For students with a DDF or DAF they must be registered for 3 hours during the summer semester.

F. Required Core Curriculum

Students beginning the ENDY program are required to take ENDY 6013 and ENDY 5113 core courses along with one of the other two courses. However, students are strongly encouraged to take all four classes listed below:

<table>
<thead>
<tr>
<th>SEMESTER</th>
<th>COURSE #</th>
<th>COURSE NAME</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>ENDY 5053</td>
<td>Quaternary Environments</td>
</tr>
<tr>
<td>Fall</td>
<td>ENDY 6013</td>
<td>Environmental Dynamics</td>
</tr>
<tr>
<td>Spring</td>
<td>ENDY 6033</td>
<td>Society and the Environment</td>
</tr>
<tr>
<td>Spring</td>
<td>ENDY 5113</td>
<td>Global Change</td>
</tr>
</tbody>
</table>

Collectively, these courses constitute 12 of the required 24 hours of graduate credit required to satisfy the ENDY coursework requirement. Students must receive a minimum ‘3.0’ average GPA (‘B’ average grade) in the ENDY core courses. Failure to maintain a 3.0 average GPA in core courses may result in dismissal from the ENDY program.

1. ENDY 5053 – Quaternary Environments

**Required course for ENDY doctoral candidates.** An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics and human adaptations. Prerequisite: graduate standing.
2. ENDY 6033 – Society and Environment

**Required course for ENDY doctoral candidates.** This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and paleoenvironmental studies, readings and discussion will explore the co-production of social and environmental systems over time.

3. ENDY 6013 – Environmental Dynamics

**Required course for ENDY doctoral candidates.** Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global self-regulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: graduate standing.

4. ENDY 5113 – Global Change

**Required course for ENDY doctoral candidates.** This course examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss, urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: graduate standing.

If any of the courses above was taken to satisfy a master’s degree requirement on this campus or another one, then the student, in consultation with the Advisory Committee, shall select a substitute course of the same general nature.

5. ENDY 6991 Environmental Dynamics Seminar

All ENDY students are required to register for 1 hour of ENDY 6991 (Environmental Dynamics Seminar) each semester for at least the first three semesters of tenure in the ENDY program or until they have successfully passed their qualifying examinations. The purpose of ENDY Seminar is to expose students to rigorous analysis of recently published research results and discussion of those results among faculty and students from different disciplines, to impress upon students the importance of engaging in active discourse on complex problems, to promote active consideration of the larger realm of Environmental Dynamics beyond the student’s dissertation topic or research work group, and to promote the intellectual growth of doctoral candidates during their time in residence at the University of Arkansas.

This course does not apply towards satisfying required course hours.

G. Elective Courses

Elective courses totaling a minimum of 12 hours of graduate credit will satisfy the remaining coursework requirement for the ENDY doctoral degree.

Elective courses may be taken in any area pertinent to the student’s program of research or to obtain additional technical skills relevant to future employment goals. However, the
student should choose a program of study in consultation with the Advisory Committee and only take those courses that are approved by the committee or required by mandate of the faculty advisor, the Comprehensive Exam Committee, the Dissertation Committee, or a combination of those entities.

H. Example Schedule of Sequence of Coursework

The example below provides an illustration of the typical sequence of course work for a student entering the ENDY program in the fall semester of the academic year on a 50% appointment as a graduate assistant.

<table>
<thead>
<tr>
<th>SEMESTER</th>
<th>COURSES</th>
<th>HOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>ENDY 5053, ENDY 6013, ENDY 6991</td>
<td>7</td>
</tr>
<tr>
<td>Spring</td>
<td>ENDY 5113, ENDY 6033, ENDY 6991</td>
<td>7</td>
</tr>
<tr>
<td>Summer</td>
<td>Elective course</td>
<td>3</td>
</tr>
<tr>
<td>Fall</td>
<td>Elective courses, ENDY 6991</td>
<td>7</td>
</tr>
<tr>

<td>6</td>
</tr>
<tr>
<td>Fall</td>
<td>Dissertation</td>
<td>6</td>
</tr>
<tr>
<td>Spring</td>
<td>Dissertation</td>
<td>6</td>
</tr>
</tbody>
</table>

Note above that some dissertation credits or course work may be reserved for summer sessions to ensure continuous enrollment of the student during his/her tenure in the ENDY program. All student on 12 month appointments are required to take 3 hours in summer session and once a student is ABD he/she must be enrolled in at least one hour each semester until graduation.

V. QUALIFYING EXAMINATIONS

This section describes the nature and procedures used for ENDY qualifying examinations. These examinations are referred to as the comprehensive examinations and are preferably taken in the student’s third semester of enrollment in the ENDY program. Requests to defer comprehensive examinations must be made in writing to the ENDY steering committee at least 3 months in advance. In addition, any requests for deferral must be accompanied by strong supporting justification from the student’s primary doctoral advisor or advisory committee. However, requests for deferral of the comprehensive examinations will not be granted except under the most unusual circumstances.

During the 2005-2006 academic year, the ENDY Steering Committee approved sweeping changes in the written comprehensive examination procedure as part of the qualifying examinations for candidacy in the Environmental Dynamics Program. The document provides guidance to all ENDY students, faculty advisors, and committees regarding the intent and purpose of the new written examination format as well as program procedures to be followed in the conduct of these examinations.
The comprehensive examinations consist of two rigorous examinations: 1) a written exam consisting of two manuscripts. The first being an overview of the subject of your doctoral research and the second is a proposal for funding of this research in an NSF or equivalent format. Once the overview and proposal are approved, an oral defense of the dissertation proposal completes the comprehensive exams. Both examinations are intended to evaluate the level of scholarship of the student by assessing the student’s command of information learned in required courses and determining the adequacy of the student’s intellectual preparation to engage in significant research leading to completion of the dissertation. As such, successful completion of these examinations marks an important milestone in the student’s progress toward the degree as she/he makes a transition from largely classroom-oriented study to independent research that is the hallmark of the doctoral tradition of academic achievement.

The primary motivation for changing the format of the written comprehensive examination was a desire by the ENDY faculty to develop a process more conducive to advancing the research agenda of individual students while at the same time providing a means for examination committees to better evaluate the preparation and suitability of each student for their proposed doctoral research.

Policies and procedures related to completion of the new written comprehensive examination format are provided below as a reference for all students, committee chairs, and committee members.

**QUICK REFERENCE:**

**ENDY WRITTEN COMPREHENSIVE EXAMINATION PROCEDURES**

**2nd SEMESTER TASKS**

1. Comprehensive Examination Committee assembled during student’s 2nd semester in the ENDY program.

2. Committee membership restricted to faculty with Graduate Faculty I or II Status.

3. Committee must have five faculty (advisor + four) representing at least two disciplines.

4. Committee meets with student to become familiar with student’s background, coursework, dissertation interest, and other experiences.

5. General topics are selected between the student and the committee; the student prepares reading lists of journal articles, books, chapters, etc. that are appropriate for the topic; the committee may modify the list. These readings lists shall define the “universe” of materials for which the student shall be responsible on the written exam.

**3rd SEMESTER TASKS**

1. Ideally, during the preceding summer or earliest two weeks of the semester, students convene their committee to discuss the written comprehensive exams.
2. Comprehensive Examination Committee prepares topic for a) review paper and b) research proposal that will constitute the written comprehensive examination.

3. Students are given exactly 30 days to complete both writing tasks. It is imperative that all committees adhere to this policy.

4. Committee chair informs ENDY director in writing of the starting date for the exam. Both written assignments are due no later than 5:00 p.m. exactly 30 days later. No exceptions except under the most extraordinary conditions.

5. Written comprehensive examination has two parts: a) scholarly review paper, b) formal research proposal in NSF style. Both written assignments are due at 5:00 p.m. on the 30th day following their assignment to the student.

6. Written works are evaluated “Excellent”, “Very Good”, “Good”, “Fair”, “Poor”, four out of five committee members must agree that the works rank at least “Good” to pass the exam.

A. Written Comprehensive Examinations

1. Comprehensive Examinations Committee

   During the second semester of enrollment in the ENDY program, and in consultation with the Advisory Committee, each student will form a Comprehensive Exam Committee. This committee consists of the advisor and at least four other faculty members who hold the rank of Faculty I and II on the Graduate Faculty and who represent two or more disciplines.

   This committee is selected to reflect an understanding of the student’s general research program, and its function is to prepare and grade the student’s written comprehensive exams and oversee the oral defense of the dissertation proposal. Normally, there is some carryover between the Advisory Committee, the Comprehensive Examination Committee, and the Dissertation Committee. Further, these committee members are normally Fayetteville campus faculty members in order that they know the student and her/his work and interests.

   The student’s written examinations will be tailored to the individual student, stressing that student’s background, course work, dissertation interest, and other experiences that are relevant to the student’s career goals. The committee will consult with the student during the student’s second semester in the ENDY program. The purpose of an early meeting with the student is to allow the committee members to decide the nature of the examination.

2. Structure of the Written Comprehensive Examination

   The student’s Comprehensive Examination Committee will approve the topic for the examination, critique the written works, and determine if the student has passed all the sections of the exam. All members of the student’s committee will participate in these three tasks. In evaluating student performance on the written comprehensive exam, there must be at least four favorable votes (of five) among the committee to confer successful completion of that part of the examination.
The Comprehensive Written Examination will be composed of two written works to be completed during a 30 day period in the student’s 3rd semester of enrollment in the ENDY program. The chair of the Comprehensive Examination Committee will provide a written memo to the ENDY Director indicating the starting date of the student’s examination. The examination will end at 5:00 p.m. exactly 30 days later. This date will be monitored by the ENDY Program Coordinator and verification of submission of both written examination documents will be provided by the committee chair. No extensions to this time frame will be permitted except under the most extraordinary conditions. The ENDY director and co-directors will have sole responsibility for determining whether or not an exception under ‘extraordinary conditions’ will be granted.

The first of the required written works will be a comprehensive, scholarly review of a topic relevant to the student’s intended dissertation research. This written work will examine in critical detail extant knowledge in this topic area, significant concepts and controversies related to this topic, and gaps in knowledge related to this topic that may lead to new, innovative research to enhance knowledge related to this topic. It is expected that the quality of this review paper will be such that it could be submitted for review to a relevant academic journal with minor or no revision.

The paper should conform to formatting requirements of a specific academic journal to be determined and agreed upon by the Comprehensive Examination Committee. The paper should be of page length appropriate for that journal, double-spaced, with full citations, figures and tables compiled at the end of the manuscript. A typical manuscript prepared for submission to an academic journal will be approximately 25-30 pages of text with tables, figures, and references cited added as necessary.

In preparation for the written comprehensive examination, it is imperative for the committee chairs and all the committee members to meet early with the student to discuss research interests, the direction of desired dissertation research, and the student’s background relevant to conducting this research. The committee reaches consensus regarding the nature of prospective research, it should begin deliberation on a suitable topic to be reviewed by the student. It is the duty of the committee to develop a topic for review that is sufficiently broad that it enables adequate evaluation of the student’s background and ability yet sufficiently narrow that the review paper can be composed during the 30 day interval of the examination.

The second written work to be assessed by the Comprehensive Examination Committee will be a research proposal composed by the student in the format typical of a National Science Foundation grant proposal. It is expected that the document will conform to all proposal formatting requirements as specified in the NSF Grant Proposal Guidelines (http://www.nsf.gov/pubs/policydocs/pappguide/nsf14001/gpg_index.jsp). In order to make the writing tasks for this examination more manageable, proposals prepared by students will contain only the following sections as specified in the NSF Grant Proposal Guide.

1. Project summary (NSF GPG item 2b)

2. Project description (NSF GPG item 2d)
3. References cited (NSF GPG item 2e)

4. Two page biographical sketch (NSF GPG item 2f)

5. Budget (GA salary, fringe benefits, travel, materials/supplies, other direct costs, facilities & administrative costs, tuition)

6. Facilities and equipment (this will be short, but should include access to computers, software, field equipment, and vehicles of various kinds, instrumentation such as microscopes or other analytical devices)

The project description (including text, figures, and tables) cannot exceed 15 single-spaced pages. The proposal should provide a detailed description of research of interest to the student, preferably related to the student’s dissertation, and should by hypothesis driven. The specific topic of the proposal should be agreed upon by the Comprehensive Examination Committee in consultation with the student.

Throughout the 30 day interval of the examination, the student is permitted to confer with individual committee members to receive clarification or additional guidance with technical or scholarly issues. However, the committee shall not edit portions of either the review manuscript or research proposal during the examination interval; a primary purpose of the exams is to determine the adequacy of the student’s technical writing capabilities.

Upon completion of the written works, the student will provide each member of the Comprehensive Examination Committee with a copy (either hard copy or electronic version if requested by committee members). It is the duty of the Comprehensive Examination Committee to review both documents objectively, critically, and fairly to assess the student’s preparation and scholarship regarding the assigned topics. Upon review of the written works, the committee will convene to discuss the strengths and weaknesses of the written works and to determine the student’s overall performance in completing the assigned tasks. Evaluation will take the form of a qualitative statement of “Excellent”, “Very Good”, “Good”, “Fair”, or “Poor”. Following evaluation of the written works, the committee will report directly to the student and ENDY director. Students must receive passing assessments for at least 4 of the 5 committee members in order to be permitted to move on to the next phase of the qualifying examinations (oral defense of dissertation proposal).

3. Procedure for Failed Written Comprehensive Examination

If the student does not pass a written assignment, a second opportunity to take and pass the assignment(s) may be arranged at the discretion of the Comprehensive Examination Committee. The second written comprehensive exam will be conducted using a format composed of specific questions submitted by the committee members. The general subject areas to be covered during this second examination will be:

- Environmental Dynamics issues from the core curriculum and related courses,
- Methods related to the student’s research topic;
• Theory and previous works of other related to the student’s research topic;

• Substantive material related directly to the student’s dissertation topic.

Normally, the exams are given in the order indicated above.

The student’s Comprehensive Examination Committee will prepare the questions, grade the answers, and determine if the student has passed all the sections of the exam using the qualitative evaluation “Pass” or “Fail”. All members of the student’s committee will participate in these three tasks. In evaluating student performance on each section of the exam, there must be at least four favorable votes (out of five) among the committee to confer successful completion of that part of the examination.

Exams will be written over four consecutive days, one part being written each day. The period for writing each exam will be approximately four hours per day. The advisor will be responsible for locating a suitable room in which the student may write the exam. Unless the committee agrees to a change in the normal procedures, for a particular part of the exam, these exams are closed-book exams. Necessary preparations will be given to securing space and a neutral computer, to which the student does not normally have access. Exams may be computer-written or hand written depending upon the student’s choice. The second written comprehensive exam must be passed in entirety. That is, four of the five committee members must agree that the exam is passing in its entirety.

If the student fails to pass all sections of the exam on the second opportunity, the committee has additional discretion to recommend, under very special circumstances, that the student be permitted to take the exam of a third (and final) time. If a student needs to retake the exam that will occur during the following semester (at the next earliest opportunity) and the student must pass the entire exam before proceeding further in the ENDY program.

If a student fails any portion(s) of the written comprehensive exam and declines an opportunity to retake the exam, the failing grade will stand and the student will be dismissed from the ENDY program.

B. Defense of the Dissertation Proposal

Following completion of all parts of the Written Comprehensive Examination, the student will submit a dissertation proposal to the Comprehensive Examination Committee for review. This proposal will be a document of approximately 15 single-spaced pages and should include appropriate figures and references to pertinent literature. The proposal should be organized and written so that it could, in most cases, be submitted as a National Science Foundation doctoral dissertation research improvement or graduate fellowship proposal.

Once a proposal is submitted to the Comprehensive Examination Committee, it must be defended through a public oral presentation and examination in a venue open to the university community at large. During the defense, the student is expected to make a brief presentation outlining the proposed program of dissertation research, including background and justification
for the proposed research, methods to be employed during the research, and the significance of the research with respect to the specific field of inquiry and the broader realm of Environmental Dynamics.

At the conclusion of the student’s presentation, members of the university community, the public, and the Comprehensive Examination Committee shall ask questions of the student in order to clarify the research agenda, probe the depth of the candidate’s understanding of the proposed research, and further assess the adequacy of the candidate’s preparation to proceed with research leading to the doctoral degree. The oral exam must be successfully passed before the student advances to candidacy and before the dissertation can be written. Failure to pass this important examination will result in dismissal from the ENDY program. At the discretion of the student’s committee, the oral exam may be taken a second time if it is not passed the first time. All parts of the Written Comprehensive Examination and Defense of the Dissertation Proposal defense should be completed no later than the end of the student’s second year (4th semester) in the program.

If a student fails the oral defense of the dissertation proposal and declines an opportunity to defend the proposal a second time, the failing grade will stand and the student will be dismissed from the ENDY program.

VI. DOCTORAL DISSERTATION RESEARCH

Each candidate in the ENDY program must complete a doctoral dissertation on some topic in the major field. The topic assignment shall be made and a title filed with the Dean of the Graduate School at least one year before the final examination, the specific problem and subject of the dissertation to be determined by the major adviser, the candidate, and the Advisory Committee. The completed dissertation must be a definite, scholarly contribution to the major field. This contribution may be in the form of new knowledge of fundamental importance, or of modification, amplification, and interpretation of existing significant knowledge.

Each candidate will formulate a research topic on which to focus during her/his tenure in the ENDY program. This research topic will be selected through consultation with the Advisory Committee. The research topic will be conveyed to the director during the first year of studies, who will affirm that the topic is compatible with ENDY principles of studying human-environmental interactions.

A statement of the student’s research topic, once approved, will be signed by both the student and the dissertation advisor and placed in the student’s permanent file. This research topic may be changed at any time while the student is in the program, but such changes must be approved in consultation with the Advisory or Dissertation Committee, and such approval documented in writing and included in the students file.

In cases where a student has successfully passed qualifying examinations and desires to change the dissertation topic, the Dissertation Committee will have discretion to determine whether or not re-examination of all or parts of the candidate’s qualifications is necessary or justified. It is expected that any decision to re-examine the candidate will be made with the consent of the candidate and the dissertation advisor. If a candidate desires to change
dissertation topics but refuses to submit to re-examination, either all or part, the Dissertation Committee will have discretion to reject the proposed change or dismiss the student from the ENDY program. In addition, a change in dissertation topic may be accompanied by appointment of a new Dissertation Committee composed of faculty better qualified to direct and advise the new topic.

Typewritten copies of the completed dissertation in the prescribed form must be presented to the candidate's advisory committee for approval at least six weeks before the degree is to be conferred. After approval by the committee and the Dean of the Graduate School, two copies must be deposited with the graduate school at least two weeks before the degree is to be conferred, together with two copies of an abstract, of not more than 350 words, approved by the major adviser as suitable for publication. The third copy of the dissertation shall be presented to the ENDY Program.

A. Purpose of the Dissertation

The degree of Doctor of Philosophy is awarded in recognition of high scholarly attainment as evidenced by a period of successful advanced study with at least a 3.0 cumulative graduate grade point average, the satisfactory completion of certain prescribed examinations, and the development of a dissertation covering some significant aspect of a major field of learning.

The purpose of the dissertation is to engage the candidate in rigorous scholarship and research that contributes significantly to human knowledge. This requires active research on the candidate’s chosen topic including a thorough review of previous works of a similar or related nature, formulation, testing, and validation of hypotheses through data gathering and analysis, and synthesis of results of experiments or observations in a substantial body of work that can be disseminated to the broader academic community through publication in refereed academic journals, proceedings, and books.

B. Dissertation Committee

Upon successful completion of the written comprehensive examinations and the oral dissertation proposal defense, the student will assemble a Dissertation Committee to be charged with oversight of the dissertation. This committee consists of the student’s advisor and a minimum of two additional faculty members. At least two disciplines must be reflected in the makeup of this committee.

The primary purpose of this committee is to guide the student while conducting original research for a dissertation. Therefore, faculty members who are knowledgeable about dimensions of the student’s research should be selected to serve on this committee. In addition to at least three faculty members from the University of Arkansas, a student may select an external member from a non-University of Arkansas (Fayetteville) institution to serve on his/her committee provided the member is approved for faculty status of adjunct by the university on our campus. This fourth person, although not required, may add particular expertise in some dimension that is not reflected by other members of the committee. An example would be an expert who is very familiar with some subject matter treated by the student in his/her
dissertation. All faculty members who are providing major dissertation advising (significant substantive input) will normally be included on the dissertation committee.

C. Structure and Composition of the Dissertation

In consultation with the Dissertation Advisor and the Dissertation Committee, the student will develop an outline for the structure and composition of the dissertation. In general, faculty advisors and committee members encourage students to structure their dissertation in such a way that a minimum of three contributions to the scholarly literature may be extracted from the body of the dissertation.

Details regarding the most suitable format in which to achieve this objective are reserved for discussion among the candidate and her/his committee. It will be the role of the Dissertation Committee to approve the final format, structure, and composition of the dissertation. The Graduate School provides additional requirements for formatting of the dissertation in the Guide to Theses and Dissertations (http://grad.uark.edu/dean/thesisguide.php). Students are expected to adhere to all requirements of the Graduate School and their respective dissertation committees in completing the final dissertation document.

VII. FINAL EXAMINATION

A final examination (commonly referred to as the dissertation defense) of each candidate for the degree of Doctor of Philosophy will be organized as a public presentation (oral). The dissertation advisor will forward to the Dean of the Graduate School, not less than ten (10) business days before the date of the final oral examination, an abstract of the dissertation accompanied by a memorandum announcing the date, time, and place of the oral examination. The examination will be primarily concerned with the field of the dissertation, but may also include other aspects of the candidate's graduate work. The examining committee shall consist of the student's Dissertation Committee and others who may be included at the discretion of the dissertation advisor and the Dean of the Graduate School.

A. Structure and Composition of the Dissertation Defense

The dissertation defense will be scheduled at a time and place accessible to any members of the university community and the public at large. Typically, the dissertation defense will begin with a presentation by the candidate outlining the general principles of the dissertation topic, the hypotheses that were investigated as part of the research project, discussion of research methodologies, and synthesis of results of the research.

Following the presentation, the dissertation advisor will serve as moderator of an open questioning period. During this time, it will be the responsibility of the dissertation advisor, as chair of the Dissertation Committee and moderator of the dissertation defense, to ensure that questions from either committee members or the public are relevant to the candidate’s body of work as represented by the dissertation. It is recognized that free and open discourse during the dissertation defense is part of the centuries-old doctoral tradition, and while the questioning period can be intense, wide-ranging, highly focused, and introspective, it is expected that examination of the candidate throughout the dissertation defense will be conducted with professional decorum and in the long-standing spirit of academic inquiry.
VIII. SUBMITTING THE COMPLETED DISSERTATION

Three typewritten copies of the completed dissertation in the prescribed form must be presented to the candidate's dissertation committee for approval at least six weeks before the degree is to be conferred. After approval by the committee and the Dean of the Graduate School, one copy must be submitted to the Graduate School on cotton paper at which point the student will be given instructions how to electronically submit their dissertation to the publisher. Please check the graduate school website for submission deadlines each semester. A copy of the dissertation shall be presented to the candidate's major department.

One copy of a student’s completed dissertation must be submitted to the ENDY office in addition to copies deposited in the library and with the student’s advisor. This office copy may be printed on non-bond paper and it should be submitted as loose pages suitable for binding. Upon submission of the dissertation, the ENDY office will arrange for binding by the University of Arkansas Printing Services.

IX. GRADUATION

A student cannot be cleared for graduation until an application for the degree has been filed with the Registrar's Office and the appropriate graduation fee has been paid. The degree application card is obtained from the Graduate School Office and filed with the Registrar for the semester in which the student expects to receive the degree. If the student does not graduate in the indicated semester, the student must reapply for graduation by contacting the Registrar's Office. Please refer to the Master's Calendar or Doctoral Calendar for specific deadline dates.

Twice a year, the University of Arkansas offers a number of ceremonies in the month of May and December for graduates who have completed graduation requirements within the academic year. The May graduation is the largest of the ceremonies each year. Graduate students are recognized at the All-University Commencement ceremony which begins at 9:00 on the 2nd Saturday of May and runs approximately 2 hours. Additional information is made available in the spring semester.

A. Participation in Commencement Ceremony

Summer, fall, and spring Degree Recipients/Applicants are invited to participate in the All-University Commencement ceremony. Degree applicants for the future summer and fall semester MAY participate with approval of their advisor. A form is required and may be obtained from the Graduate School or our home page. An immediate family member (spouse, parent, or child) who is a member of the academic faculty at the University of Arkansas, Fayetteville, may present your diploma. Please contact the Graduate School for arrangements.

While earning the doctoral degree is primarily an individual achievement, that achievement is never accomplished without the dedicated assistance of many people. As a courtesy to those who may have sacrificed many hours on your behalf, you should consider participating in the commencement ceremony as a gesture of respect and thanks to those who helped you reach the pinnacle of academic achievement.
B. Deadline for the Name of Graduate to be Included in Commencement Program

The Graduate School makes the effort to include as many graduate students in the Commencement Program as possible. Keep in mind that there are printing deadlines. We tell students that their name should be included if they apply for graduation by late February (October 1st to be included in the Fall Commencement). All past degree recipients for the academic year are automatically included.

C. Dissertation Titles in Commencement Program

The dissertation title is included for doctoral recipients/candidates. Every effort to have an up-to-date title on file with the Graduate School by late February is appreciated.

X. ANNUAL REVIEW OF GRADUATE STUDENT PROGRESS

In accordance with the policies of the University of Arkansas Graduate School and the Graduate Council, it will be the policy of the Environmental Dynamics Program (ENDY) to conduct an annual review of progress toward the degree for each enrolled student. At a minimum, the review will examine progress:

1) Toward completing required course work with the minimum grade point average defined by the Graduate School;

2) In successfully completing all qualifying examinations required to be admitted to candidacy for the degree as required by the Environmental Dynamics Program and the Graduate School;

3) Toward completing dissertation requirements including but not limited to:

   a) Establishing Advisory, Comprehensive Exam, and Dissertation Committees as prescribed in the Environmental Dynamics Graduate Handbook;

   b) Preparing a formal, written dissertation proposal as prescribed in the Environmental Dynamics Graduate Handbook;

   c) Conducting an initial meeting with members of the Advisory and Dissertation committee as prescribed in the Environmental Dynamics Graduate Handbook;

   d) Conducting research related to the dissertation;

   e) Preparing manuscripts describing results of original research to be submitted to appropriate academic journals;

   f) Initiate annual review with committee members;

   g) Writing the dissertation;
4) Toward completing other specified requirements for the degree (e.g. satisfactory evaluations of teaching, participation in ENDY or University of Arkansas service activities, etc.).

**A. Annual Review Procedure**

The annual review of graduate student progress to be enacted by the Environmental Dynamics Program will follow the procedure outlined below. The ENDY Program has created a checklist of milestones that should be accomplished each semester to aid the student/advisor in evaluating the progress made each year:

1) During the Spring semester of each academic year, the Director of the ENDY program will remind each student enrolled in the ENDY program to initiate a meeting with his/her advisor and at least one additional member of the student’s advisory or dissertation committee for the purpose of evaluating student progress toward the degree. The student should plan sufficiently so that this review can be completed on or before 15 April each spring semester.

   a) The annual progress review will consist of a face-to-face interview with the student and the committee member(s) selected to serve as reviewers. In situations where it may be impractical to meet the student face-to-face, the review may be conducted with the advisor and committee member(s) via telephone or e-mail correspondence, or other vehicle agreed to by the involved parties.

2) Upon completion of the review, the committee will articulate its assessment regarding progress toward the degree directly to the student by indicating that the student is making normal progress, adequate progress, or inadequate progress.

   a) **Normal progress** is defined as a combination of the items listed below appropriate to the student’s seniority within the ENDY program:

      i) Student has established an Advisory, Comprehensive Exam, or Dissertation Committee;

      ii) Completing required ENDY core courses during the first year of enrollment and residence;

      iii) Completing at least 18 hours of course work per academic year or comparable work towards completion of the degree (15 if on a teaching assistants);

      iv) Maintaining a minimum grade point average of 3.20;

      v) Student is on schedule to complete qualifying examinations during the 3\(^{rd}\) semester of enrollment;

      vi) Student has made significant progress toward defining a dissertation topic;

      vii) Student is in the process of writing a formal dissertation proposal to be presented to advisory or dissertation committee;
viii) Student is working with advisor to secure funding for research leading to the dissertation.

ix) Student is conducting research related to the dissertation;

x) Student is preparing manuscripts detailing results of original research to be submitted to appropriate academic journals;

xi) Student is writing dissertation.

xii) Student is on pace to complete the PhD in 3 years (6 academic semesters);

xiii) Student has performed teaching duties satisfactorily.

b) **Adequate progress** toward the degree is defined as a combination of the items listed below appropriate to the student’s seniority within the ENDY program:

i) Completing required ENDY core courses during first 4 semesters of enrollment;

ii) Completing at least 15 hours of coursework per academic year or comparable work towards completion of the degree;

iii) Maintaining a minimum grade point average of 2.85;

iv) Student is on schedule to complete qualifying examinations during the 4\(^{th}\) semester of enrollment;

v) Student has established an Advisory or Dissertation committee;

vi) Student has made significant progress toward defining a dissertation topic;

vii) Student is in the process of writing a formal dissertation proposal to be presented to advisory or dissertation committee;

viii) Student is on pace to complete the PhD in 4 years;

ix) Student is working with advisor to secure funding for research leading to the dissertation.

x) Student has performed teaching duties satisfactorily.

c) **Inadequate progress** toward the degree is defined as a combination of the items listed below appropriate to the student’s seniority within the ENDY program:

i) ENDY core courses not completed during first 3 semesters of enrollment;

ii) Less than 12 hours of coursework per academic year or comparable work towards completion of the degree;
iii) Minimum grade point average falls below 2.85;

iv) Student not on schedule to complete qualifying examinations during the 4th semester of enrollment;

v) Student has not established an Advisory, Comprehensive Exam, or Dissertation Committee;

vi) Student has not made significant progress toward defining a dissertation topic;

vii) Student has not written a formal dissertation proposal to be presented to advisory or dissertation committee;

viii) Student is not on pace to complete the PhD in 4 years;

ix) Student is not working with advisor to secure funding for research leading to the dissertation.

x) Student has not performed teaching duties satisfactorily.

Following the review of student progress, the review form provided by the Graduate School will be completed to include written comments regarding the student’s progress, as well as recommendations for continued progress or recommendations to remediate inadequate progress within a realistic time frame (since the review occurs during late spring semester, either end of summer or midway through fall semester might be a reasonable time frame).

At the conclusion of the review, the student and advisor will sign the review form, and copies will be distributed to the student, the advisor, and the Director of the ENDY program. The annual review forms will become part of the student’s permanent file.

The Director of the ENDY program will report the progress of each student in the program to the ENDY Steering Committee, including necessary remediation steps for those students whose progress was evaluated as inadequate. The ENDY Steering Committee will make the final decision regarding student progress. Once this final decision is rendered, the Director of the ENDY program will forward the original signed review forms of all students to the Graduate School for inclusion in the students’ permanent files.

Students who refuse to participate in the review process will be placed on short-term probationary status while reasons for their refusal are heard.

If adequate cause for by-passing the review cannot be determined and the student still refuses to participate in annual reviews of progress, a statement reporting the student’s refusal to be reviewed will be forwarded to the Dean of the Graduate School and dismissal proceedings will be initiated by the Graduate School.

B. Failure to Progress

If a student who receives an evaluation of inadequate progress fails to meet the minimum
remedial steps specified by the review committee within the specified time frame, a Report-of-Non-Progress will be provided to the Director of the ENDY program by the chair of the student’s evaluation committee (ordinarily the PhD advisor). This report will provide details of the failed steps.

1) The Report-of-Non-Progress will be treated as confidential information and will be forwarded to members of the ENDY Steering Committee for review. If a majority of ENDY Steering Committee Members agree with the findings of the Report-of-Non-Progress, this report will be forwarded to the Graduate School for additional action.

2) At each stage of this process, the student will be informed by the Director of the ENDY program what actions are being taken. The student may appeal decisions regarding inadequate progress in accord with guidelines of the Graduate School at the University of Arkansas through the formal grievance process.

3) In developing guidelines for the annual review of graduate student progress, the ENDY Steering Committee recognizes that extenuating circumstances of employment, research funding, or other relevant conditions may impact on students’ progress. As such, the ENDY Steering Committee reserves the right to consider such circumstances on a case-by-case basis.

XI. ACADEMIC PROBATION POLICY

The faculty of the ENDY program is committed to assisting students as they progress through the curriculum during their tenure in the ENDY program. Every effort is made to admit students of high academic achievement and motivation to help ensure success in obtaining the doctoral degree.

As such, the ENDY program holds the academic standards established by the University of Arkansas Graduate School in high esteem and expects students to perform at least to the minimum established standards. If, for any reason, student performance falls below these minimum standards such that the student is placed on academic probation, the ENDY program regards this as a serious matter. In these situations, the student should recognize that the first priority is to raise performance such that academic probation is lifted by the Graduate School. A student on academic probation will not be permitted to progress toward the doctoral degree until such time that academic performance improves to the point that academic probation is lifted.

The following policy regarding academic probation is that of the Graduate School, and is in effect in the ENDY program.

Whenever a regularly-admitted graduate student earns a cumulative grade point average below 2.85 on graded course work taken in residence for graduate credit, he/she will be warned of the possibility of academic dismissal. When a graduate student has accumulated a minimum of 15 hours of graded course work taken in residence for graduate credit with a cumulative grade point average below 2.85, and has received at least one warning, he/she will be academically dismissed from the Graduate School.
Graduate teaching and research assistants and students on Lever, Doctoral, or Chancellor fellowships must maintain a cumulative grade point average of at least 2.85 on all course work taken for graduate credit. If a student’s cumulative GPA falls below 2.85 on 6 or more hours of graduate work (one full-time semester), notification will be sent to the student and his/her department. If the CGPA is below 2.85 at the end of the next major semester (fall or spring), the department will not be allowed to appoint the student to an assistantship until such time as his/her CGPA has been raised to the required level.

XII. MISCELLANEOUS INFORMATION

A. Grievance Procedure

If at any time during the tenure in the ENDY program, the student wishes to appeal a decision rendered about the student’s level of achievement, the student should (1) contact his/her advisor in writing about the nature of the problem. If the advisor cannot resolve the issue to the student’s satisfaction, the student may (2) contact the ENDY Director in writing about the problem. If the Director cannot resolve the issue to the student’s satisfaction, the student may (3) proceed through a formal appeal procedure as set forth in the Graduate School catalogue.

B. Teaching Opportunities

Although the Ph.D. is primarily a research degree, communication skills are critical to professional development. Therefore, the ENDY faculty places an emphasis on providing candidates an opportunity to teach at either the undergraduate or graduate level. ENDY assistantships are assigned to students to teach labs and classes, and therefore teaching experience normally comes from these assignments. For other students, the ENDY faculty will attempt to identify teaching opportunities by which classroom skills may be acquired.

C. Publishing Opportunities

Successful pursuit of the doctoral degree will include the candidate becoming a contributing member of the broader academic community by disseminating information and results of research through traditional media, primarily refereed academic journals and professional meetings. The ENDY faculty recognizes the priority of demonstrating academic achievement through publication of research results in respected journals and will encourage candidates to do so at appropriate opportunities.

While the ENDY program advocates and actively promotes publication of student research results in appropriate academic media, it should be understood that the responsibility for the content of such publications resides solely with the student author and coauthors of the work.

In addition, it should be understood that any fees or page charges accrued in the process of publishing in the academic literature should be borne by either the student author or coauthors.
2. Professional Meetings

Students in the ENDY program are encouraged to become active professionals in organizations appropriate to their chosen fields of study, and are encouraged to disseminate results of their research at research symposia, national or international professional meetings, and regional professional meetings.

While the principal costs associated with student participation in professional meetings and research symposia should be borne by the student or the dissertation advisor, students may qualify for travel funds provided by the graduate school (up to $1000 from the graduate school matched with $100 from the ENDY program). For details regarding the possible availability of funds, ENDY students should contact the Program Coordinator of the ENDY program.

D. Service Opportunities

Members of the ENDY faculty recognize that service to the University of Arkansas, the community of Fayetteville, state, and nation are required elements of successful tenure at the University of Arkansas. Further, the faculty recognizes that the service of members of the university within the community provides necessary technical assistance, improves the living environment of the community, and creates a collegial atmosphere between the university and its host city.

As such, the ENDY faculty recognizes engaging ENDY students in active service to the university and community is an essential part of the training of successful doctoral candidates. Therefore, all ENDY students are encouraged to participate in service-related opportunities as they arise. Examples of appropriate service activities are 1) participation in University Day events, 2) participation in local and regional science fairs, 3) participation in community public service events such as Stream Team clean-up days, Devil’s Den highway clean-up, etc., 4) participation as representatives of the ENDY program and the University of Arkansas at community festivals such as Autumn Fest and Spring Fest, and 5) participation in educational outreach as representatives of the ENDY program and the University of Arkansas, such as speaking to public school classes.

While there is no formal requirement for service as an element of the ENDY degree, it is expected that ENDY students will provide assistance with various service-related projects as they are able.

E. Office/Lab Space

The university offers very limited student space, but some functions deserve more space than others. All ENDY teaching assistants are normally assigned an office desk for the purpose of preparing lessons and meeting with students. Desk space for this purpose is assigned with Anthropology or Geosciences space in Ozark Hall or space provided by a specific advisor. ENDY students working on research projects funded under university grants also normally use lab space for that function. Less available is space for non-GA ENDY students or for doctoral student dissertation research. When asking to use space, be prepared to specify the size and kind of space requested, whether computer or other equipment connections are involved, the times of
day the space is to be used, and similar details. Every attempt will be made to match student space needs with available facilities.

F. Continuing Graduate Credit and Transfer Credits

The university does not permit the transfer of credits from other institutions to apply towards our doctoral programs. The Graduate Catalog specifies that: “For doctoral candidates, at the discretion of the advisory committee, the program of study may be adjusted in lieu of work taken at other colleges or universities and recognized by the candidate’s committee, but it will not appear on the University of Arkansas academic record.”

Up to 12 graduate credits may be taken to apply toward a doctoral degree such as the ENDY Ph.D. prior to the student being formally accepted into the degree program. This is about one semester’s worth of course work.

G. Student Representation on the ENDY Steering Committee

Beginning fall semester, 2002, ENDY students will be asked to select one of their group to serve on the ENDY Steering Committee, for the purpose of communicating student concerns and questions to the committee. Once chosen, this representative should be the conduit for expressing concerns, questions, and suggestions to the committee. This student representative shall be excused from meeting sessions at which personnel issues are evaluated or discussed. This representative is a voting representative except on faculty, personnel, and student issues.
